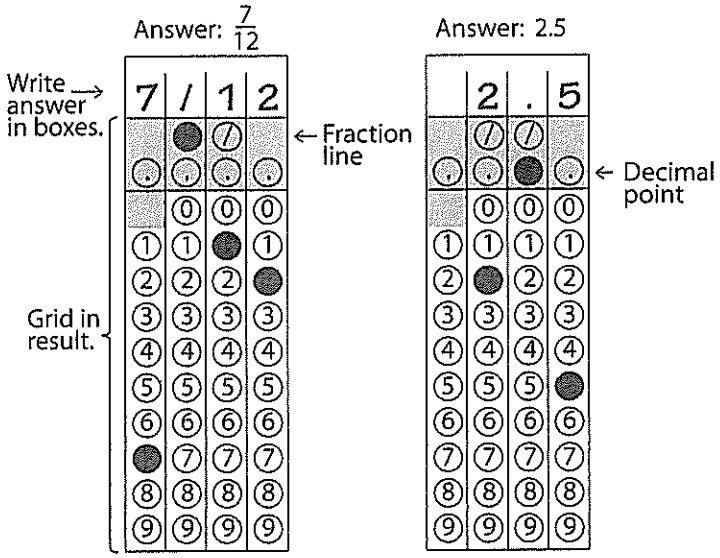
3. No question has a negative answer.
4. Some problems may have more than one correct answer. In such cases, grid only one answer.
5. **Mixed numbers** such as $3\frac{1}{2}$ must be gridded as 3.5 or 7/2. (If  is entered into the grid, it will be interpreted as $\frac{31}{2}$, not $3\frac{1}{2}$.)
6. **Decimal answers:** If you obtain a decimal answer with more digits than the grid can accommodate, it may be either rounded or truncated, but it must fill the entire grid.



Acceptable ways to grid $\frac{2}{3}$ are:

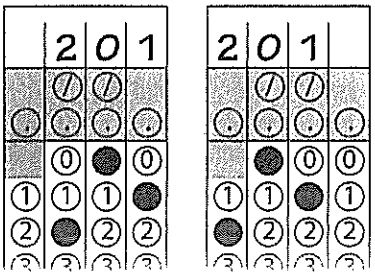
Answer: 201 – either position is correct



NOTE: You may start your answers in any column, space permitting. Columns you don't need to use should be left blank.

Wyatt can husk at least 12 dozen ears of corn per hour and at most 18 dozen ears of corn per hour. Based on this information, what is a possible amount of time, in hours, that it could take Wyatt to husk 72 dozen ears of corn?

Pattern

$W \geq 12$ corn $\quad 12 \leq x \leq 18$ 1st

$W \leq 18$ $\quad 24 \quad 36$ 2nd

$36 \quad 54$ 3rd

$48 \quad (72)$ 4th

$60 \quad 90$ 5th

$(72) \quad 108$ 6th

The posted weight limit for a covered wooden bridge in Pennsylvania is 6000 pounds. A delivery truck that is carrying x identical boxes each weighing 14 pounds will pass over the bridge. If the combined weight of the empty delivery truck and its driver is 4500 pounds, what is the maximum possible value for x that will keep the combined weight of the truck, driver, and boxes below the bridge's posted weight limit?

x = # of boxes

$14x + 4500 \leq 6000$

$14x \leq 1500$

$x \leq 107.142$ # of boxes

$\therefore x \leq (107)$

A dairy farmer uses a storage silo that is in the shape of the right circular cylinder above. If the volume of the silo is 72π cubic yards, what is the diameter of the base of the cylinder, in yards?

$V = \pi r^2 h = \pi r^2(8) = 72\pi$

$r^2 = 9$

$r = 3$ $(d = 6)$

$$h(x) = \frac{1}{(x-5)^2 + 4(x-5) + 4}$$

For what value of x is the function h above undefined?

$x = 3$

$(x-5)^2 + 4(x-5) + 4$

$x = 3 \quad y = 0$

$x^2 - 10x + 25 + 4x - 20 + 4 = 0$

$x^2 - 6x + 9 = 0$

$(x-3)(x-3) = 0$

Questions 37 and 38 refer to the following information.

Jessica opened a bank account that earns 2 percent interest compounded annually. Her initial deposit was \$100, and she uses the expression $\$100(x)^t$ to find the value of the account after t years.

37

What is the value of x in the expression?

$\$100(1.02)^t$

$x = 1.02$

38

Jessica's friend Tyshaun found an account that earns 2.5 percent interest compounded annually. Tyshaun made an initial deposit of \$100 into this account at the same time Jessica made a deposit of \$100 into her account. After 10 years, how much more money will Tyshaun's initial deposit have earned than Jessica's initial deposit? (Round your answer to the nearest cent and ignore the dollar sign when gridding your response.)

$100(1.02)^{10} \approx 121.899$

$100(1.025)^{10} \approx 128.008$

$128.008 - 121.899 \approx 6.11$
